Innovations in the Integrated Management of Pediatric Thyroid Cancer

Message from the Guest Editors

Thyroid cancer is acknowledged to be an international priority in healthcare. It is currently one of the most common cancers in women worldwide. Recent demographic trends indicate a continuous increase in incidence in childhood. Increasing efforts and resources have been devoted to the search for a systematic and optimized strategy for thyroid cancer diagnosis and treatment in children and adolescents. Currently, the Thyroid Cancer Center model is considered to be the gold standard, and its use ensures optimal patient-centered and research-based clinical services through multidisciplinary and integrated management. Surgical treatment has gradually evolved toward target approaches for children with the adoption of new technologies. The evolution of evidence-based guidelines has led to a steady improvement in the care of children. This Special Issue will highlight innovations in the integrated management of thyroid cancer in childhood, their potential advantages, and the many open issues that remain to be properly defined and addressed.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
