Signalling Pathways of Cancer Stem Cells

Message from the Guest Editor

Cancer cells with stem-like properties, known as cancer stem cells (CSCs), are responsible for tumor initiation, drug resistance, metastasis of several cancers. CSCs differentiate into self-renewing cells and differentiated cells that make up the entire bulk of the tumor. This Special Issue of *Cancers* is dedicated to Signaling Pathways of Cancer Stem Cells. Although several studies focused on the specific markers of cancer stem cells, the mechanism of maintenance and target of cancer stem cells is poorly understood. To further improve the understanding of cancer stem cell maintenance and target, we have to focus on specific signaling involved in cancer stem cell maintenance. We expect submissions for this endeavor from researchers, molecular pathologists, and oncologists who can better understand cancer stem cells in different cancers.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
