The Role of Surgery in Thoracic Cancers

Message from the Guest Editors

Innovative systemic treatments, minimally invasive thoracic surgery approaches, and perioperative medicine have changed the role of surgery in the treatment of thoracic cancer. Thanks to advances in diagnostic imaging, pre-invasive and early-stage lung cancer can be detected, and minimally invasive approaches and innovative image-guided resection are actively used. Additionally, long-term survival from advanced and metastatic tumors has been ensured by multidisciplinary treatment. Since lung cancer is the most common chronic disease among thoracic cancers, complete oncological resection must be performed with a view to preserving lung tissue and maintaining lung function in preparation for future disease progression. Surgery may also be worthwhile if a relapse occurs or because of the palliative condition chosen. This Special Issue entitled “The Role of Surgery in Thoracic Cancers” discusses the current role and future prospects of surgery in thoracic cancer.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
