

Topical Collection

Treatment of Glioma

Message from the Collection Editors

The management and treatment of adult patients with gliomas present some of the most significant challenges in oncology today. The classification of these tumors has recently undergone major changes, which will bear an impact on treatment and patient monitoring.

This Special Issue aims to give an overview of the latest consensus-recommended conventional treatment paradigms as well as to present new investigational clinical treatment modalities for glioma patients. The intention is also to give an overview of brain tumor rehabilitation programs and the patients' own experiences of treatment as reflected in quality of life assessments.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: radiological and molecular diagnosis and classification, surgical treatment including laser interstitial therapy, chemotherapy, radiotherapy, tumor-treating fields, immunotherapy, novel drug development, drug repurposing, clinical trials, rehabilitation, neuropsychological aspects, cognition and quality of life.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
