

## Special Issue

# Emerging Treatment Strategies for Multiple Myeloma

### Message from the Guest Editor

The outcome of multiple myeloma has improved in recent decades. Proteasome inhibitors, immune-modulators and monoclonal antibodies have shown impressive antimyeloma activity and are currently incorporated in clinical regimens. New immunotherapeutic strategies such as CAR-T cells and bispecific antibodies are currently explored and target new antigens such as BCMA, SLAMF7 or GPRC5D. In addition, new signaling pathways (BCL2 family proteins, MYC, BRD4) are being targeted by small molecule inhibitors or PROTACs, and the latter are being evaluated in multiple myeloma because of its incurable nature. For this Special Issue, we are inviting you to submit papers on new immunotherapeutic strategies or targets, new inhibitors or signaling pathways that are in preclinical or clinical evaluation

### Guest Editor

Dr. Jo Caers

Department of Hematology, CHU de Liège, University of Liege, Liege, Belgium.

### Deadline for manuscript submissions

closed (30 November 2021)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
