Special Issue

Carbon Fiber Composites – Composite Driven Multifunctionality and Applications

Message from the Guest Editors

This Special Issue will focus on the composite-driven multifunctionality of carbon fiber composites (CFCs). We would like to join the competent researchers in the field of studying carbon fiber-based composites, starting from classical structural carbon fiber-reinforced polymers together with multifunctionality-driven hybrid approaches, and combination with other materials, e.g., metals, ceramics, and semiconductors, on different length scales to achieve multifunctionality on a material level. Keywords

- Polymer composites
- Multifunctionality
- Smart structures
- Smart materials
- Structural health monitoring
- Self healing
- Sensors and actuators
- Electrical, mechanical, thermal properties
- Structural characterization
- Multiphysical characterization

Guest Editors

Dr. Martin Gurka

Prof. Dr. Ulf Breuer

Dr. Lazaros Tzounis

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Craig E. Banks
Faculty of Science and Engineering, Manchester Metropolitan University, Chester Street, Manchester M1 5GD, UK

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.3 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
