Biomass—a Renewable Resource for Carbon Materials

Message from the Guest Editors

Carbon materials with astounding properties and sometimes even superior to those of commercial activated carbon materials derived from fossil-based resources can be produced from biomass. As the demand for high surface area, heteroatom functionalized micro and mesoporous activated carbon materials is growing due to their application in the fields of environment, energy, agriculture, sensing, catalysts, industry, defence and health sectors, there is an urgent need to focus on exploring the biomass feedstock as a sustainable feedstock for carbon materials production. Likewise, innovation is expected in the atomic level characterization of these materials to gain new insight into their property, structure and application. It is therefore an earnest appeal to the research fraternity in the field of “Carbon materials from biomass” to contribute their research papers actively for publication in the Special Issue, namely, “Biomass- A Renewable Resource for Carbon Materials” in the journal C—Journal of Carbon Research.

Guest Editors

Dr. Indra Neel Pulidindi

Dr. Pankaj Sharma

Prof. Dr. Aharon Gedanken

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Craig E. Banks
Faculty of Science and Engineering, Manchester Metropolitan
University, Chester Street, Manchester M1 5GD, UK

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPlus /
SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 24.3 days after
submission; acceptance to publication is undertaken in 3.9
days (median values for papers published in this journal in
the first half of 2025).
