

Special Issue

Wearable Electronics

Message from the Guest Editor

Interest in wearable electronics, that combine sensors and wireless communication to provide accurate and reliable vital information autonomously, has exploded in recent years to enhance safe and healthy living. This will impact a large range of areas, for example, healthcare, environment, security, defence, the economy and energy. Wearable electronics can be used for health monitoring, activity monitoring, disease detection, robotics, robotic surgery, implantable devices, driverless cars, artificial limb and structural monitoring, virtual reality, and augmented reality. As wearable electronics is of a highly interdisciplinary nature, it requires the convergence of many disciplines, notably from materials development, device design and fabrication, device physics, system integration, software and application verification. This Special Issue will be dedicated to providing academic and industrial communities with news of recent advancements in this exciting field. Original articles are welcome and your contribution would greatly enhance this Special Issue by offering different perspectives on this topic. Yours sincerely

Guest Editor

Prof. Dr. Zhi-Bin Zhang

Department of Engineering Sciences, Division of Solid-State Electronics, Uppsala University, Box 534, SE-751 21 Uppsala, Sweden

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Craig E. Banks
Faculty of Science and Engineering, Manchester Metropolitan
University, Chester Street, Manchester M1 5GD, UK

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPlus /
SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 24.3 days after
submission; acceptance to publication is undertaken in 3.9
days (median values for papers published in this journal in
the first half of 2025).
