

## 10th Anniversary of *Catalysts*—Feature Papers in Photocatalysis

Guest Editors:

**Prof. Dr. Detlef W. Bahnemann**

**Prof. Dr. Ewa Kowalska**

**Prof. Dr. Ioannis Konstantinou**

**Prof. Dr. Magdalena Janus**

**Dr. Vincenzo Vaiano**

**Prof. Dr. Wonyong Choi**

**Prof. Dr. Zhi Jiang**

Deadline for manuscript  
submissions:

**closed (31 January 2023)**

### Message from the Guest Editors

Dear Colleagues,

It is our pleasure to welcome you to our Special Issue “Photocatalysis”, celebrating the 10th Anniversary of *Catalysts*. As you all know, photocatalysis has become one of the key areas within the catalysis field. Since it adds just another feature to the already rather complex mechanism of heterogeneous catalysis, that is, the interaction with photons required to initiate the overall process, there is still a large number of unknowns regarding details of the underlying reaction mechanism(s). Therefore, contributions highlighting such mechanistic details are highly welcome in this Special Issue. Moreover, a photocatalyst often requires the presence of one or even several so-called co-catalysts to enable the desired chemical conversions. Therefore, we would like to invite you to submit to this Special Issue your explanations regarding the role of catalysis in a photocatalytic process. We look forward to receiving your contribution(s) as soon as possible. In addition to original research articles, we welcome review and feature articles.
