Catalysis in the Synthesis of Biologically Active Compounds

Guest Editors:

Dr. Katarzyna Wińska

Department of Food Chemistry
and Biocatalysis, Wrocław
University of Environmental and
Life Sciences, Norwida 25, 50-375
Wrocław, Poland

Dr. Wanda Mączka

Department of Food Chemistry
and Biocatalysis, Wrocław
University of Environmental and
Life Sciences, Norwida 25, 50-375
Wrocław, Poland

Prof. Dr. Antoni Szumny

Department of Chemistry,
Wrocław University of
Environmental and Life Sciences,
Norwida, 50-375 Wrocław,
Poland

Message from the Guest Editors

The purpose of this Special Issue is to present the latest developments in which various types of catalytic processes have been used to synthesize biologically active compounds. Articles that present the latest research focused on developing strategies to improve catalysis processes will be appreciated. We want our issue to include articles presenting new paths for the use of these catalysts, including industrial applications.
