Message from the Guest Editors

Dear Colleagues,

The worldwide challenges in energy supplies and climate change demand the reduction of fossil fuel consumption. New energy storage or conversion technologies that can improve energy efficiency will play a key role in the near future. This Special Issue will focus on recent advances in catalysis or electrocatalysis during chemical or electrochemical processes for energy storage or conversion. Topics on hydrogen storage and production from fossil fuel and renewable sources are also included. Full papers, communications, perspectives, and mini-reviews are all welcome.

Dr. Di-Jia Liu
