Special Issue

Advances in Photocatalysis for the Degradation of Organic Pollutants

Message from the Guest Editors

The aim of this Special Issue is to serve as a collection of original research articles or reviews of recent progress and advances in photocatalytic processes in the remediation of wastewater contaminated with organic base pollutants. This includes but is not restricted to the use of new types of photocatalysts in the oxidation of organic contaminants, preparation of new supported photocatalysts, and organic pollutants of emerging concern. Finally, new photocatalytic applications and comparisons with other types of photocatalysts are greatly welcome. I kindly invite you to submit a high-quality contribution to this Special Issue of *Catalysts* entitled "Advances in Photocatalysis for the Degradation of Organic Pollutants" and to present the latest developments in the field. Review and original research articles as well as experimental and theoretical inquiries are most welcome.

Guest Editors

Dr. Collin G. Joseph

Prof. Dr. Gianluca Li Puma

Dr. Giovanni Palmisano

Deadline for manuscript submissions

closed (15 March 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:
JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
