

Special Issue

A Multi-Faceted Approach to Hydrogen Production via Catalytic Methane Activation

Message from the Guest Editors

This Special Issue aims to comprehensively present the latest advancements and progress in the field of hydrogen production through methane activation. It welcomes the submission of review articles, standard research papers, and concise short communications. Researchers are strongly encouraged to provide detailed accounts of their experimental and theoretical findings, ensuring that all experimental procedures are thoroughly described to allow for the reproducibility of the reported results.

Guest Editors

Prof. Dr. Ahmed Sadeq A. Al-Fatesh

Department of Chemical Engineering, College of Engineering, King Saud University (KSU), P.O. Box 800, Riyadh 11421, Saudi Arabia

Dr. Ahmed A. Ibrahim

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
