

Special Issue

Catalyst Immobilization

Message from the Guest Editor

This Special Issue invites contributions on the latest research and advancements in catalyst immobilization, including but not limited to the following:

- New immobilization methods for metal complexes, organocatalysts, nanoparticles, and enzymes.
- Novel supports for catalyst immobilization.
- Advances in catalyst recovery and reuse.
- Sustainable applications in fine chemical production and environmental remediation.
- The integration of flow technologies and their impact on industrial catalysis.

This issue aims to provide a comprehensive overview of the latest advancements in catalyst immobilization, emphasizing its essential role in sustainable and efficient industrial processes.

Guest Editor

Prof. Dr. Oriana Piermatti

Laboratory of Green Synthetic Organic Chemistry, Dipartimento di Chimica, Università di Perugia, Via Elce di Sotto, 8, Perugia, Italy

Deadline for manuscript submissions

31 October 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
