

Special Issue

State of the Art of Catalytical Technology in Korea, 2nd Edition

Message from the Guest Editors

Many experts say that the chemical industry has been at the center of economic development in Korea, and catalytical technology is a cornerstone for that success. Diverse types of catalysis, including homogenous and heterogeneous catalysis, biocatalysis, and electrocatalysis, have undergone extremely rapid development for a variety of chemical reactions used in the chemical, fuel, pharmaceutical, and agricultural industries affording a wide range of products in our daily life. In this Special Issue, we are going to focus on the state of the art of catalytic technology in the Republic of Korea and the direction in which we believe we should be heading. All experimental and theoretical results on catalysis from academia and industry are encouraged to be submitted in the form of regular research articles, short communications, or reviews.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
