# Environmental Catalysis and Nanomaterials for Water Pollution Control

### Message from the Guest Editors

This Special Issue, “Environmental Catalysis and Nanomaterials for Water Pollution Control”, seeks high-quality research focusing on the latest novel advances in nanomaterials and their applications in environmental catalysis for water treatment. Topics of interest include, but are not limited to, the following:

- The synthesis and modification of nanocatalytic materials.
- The catalytic performance and selectivity of nanomaterials.
- The theory and mechanism of environmental catalysis.
- The design, analysis, control, optimization, and operation of the environmental catalysis system.
- Nanomaterial catalysis for water pollution control.
- The treatment of emerging environmental contaminants.
- The development and application of nanomaterial catalysis in the industry.
