

## Special Issue

# Novel Catalysts for Environmental Catalysis

### Message from the Guest Editors

The preservation of the environment has attracted great attention in recent years. Numerous efforts have been dedicated to the research and development of novel catalysts for environmental catalysis, which is considered to be a promising strategy to this challenge.

This Special Issue will mainly comprise research on advanced catalysts for environmental catalysis. Potential topics include but are not limited to the following: emission control, solid waste treatment, water purification, clean energy conversion, biomass conversion, CO<sub>2</sub> conversion and utilization, and hydrogen production. All studies within the scope of this Special Issue, including original research papers, review articles, short communications, and perspective articles, are invited for submission.

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
