# Feature Review Papers on Catalysis in Organic and Polymer Chemistry

### Message from the Guest Editors

We are pleased to announce the launch of our Special Issue, *"Feature Review Papers on Catalysis in Organic and Polymer Chemistry"*. This issue aims to compile high-quality review articles that highlight recent advances, challenges, and future trends in catalytic organic and polymer chemistry. We invite contributions covering, but not limited to, the following topics:

- **Catalytic organic transformations** for fine chemicals and polymer synthesis
- **Green and sustainable catalytic processes**
- **Precision polymerization** techniques
- **Design and reactivity of transition metal catalysts**
- **Mechanistic studies**, including:
  - Kinetic and spectroscopic analysis
  - Computational modeling
  - Reaction mechanisms at the molecular level

This Special Issue will serve as a platform for researchers to share insights, discuss emerging trends, and advance innovation in catalysis. We welcome your submissions and look forward to your valuable contributions!
