

# Special Issue

## Microbial Biocatalysis in Food

### Message from the Guest Editors

After a long history of relatively uncontrolled spontaneous fermentation, fermented products are now expected to fulfill many specific sensorial, nutritional, and safety properties. This can be achieved through the specific biocatalytic properties of the microorganisms used for fermentation. This Special Issue aims to present studies highlighting the specific biocatalytic activities of microorganisms or starters in order to produce specific compounds that bring aroma or texture properties as well as nutritional or safety added value. Papers on the processes of screening and selecting starters exhibiting specific biocatalytic properties as well as descriptions of strains isolated from fermented or natural matrices are welcome. The clean label use of these specific biocatalysts in non-fermented food is also of interest.

### Guest Editors

Prof. Dr. Yves Waché  
Prof. Dr. Giorgia Perpetuini  
Prof. Dr. Rosanna Tofalo

### Deadline for manuscript submissions

closed (30 January 2025)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn  
Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
