

## Special Issue

# Clean Ammonia Synthesis and Utilization for a Sustainable World: Catalytic & Electron-Driven Routes

### Message from the Guest Editors

The scope of this Special Issue is to explore the potential of ammonia as a clean carrier that could be used for energy. With the global transition from fossil fuels to intermittent renewable energy sources, there is a need for the long-term storage and long-range transmission of energy, for which ammonia is a perfect fit. Specifically, this Special Issue intends to cover the most recent progress in the catalytic synthesis of ammonia as well as electron-driven routes (electrocatalysis and photocatalysis), to gain insight into the development of materials, reactors and electro-driven devices related to one of the future sustainable energy carriers. Moreover, the Special Issue also aims to explore the scientific challenges associated with ammonia utilization in fuel cells, in combustion engines or to produce hydrogen.

### Guest Editors

Dr. Antonio Vita

National Research Council, Advanced Energy Technology Institute (ITAE) "Nicola Giordano", Messina, Italy

Prof. Dr. Fausto Gallucci

Inorganic Membranes and Membrane Reactors, Sustainable Process Engineering, Department of Chemical Engineering and Chemistry, Eindhoven University of Technology, 5612 AZ Eindhoven, The Netherlands

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
