## Catalysis in Biorefinery

### Message from the Guest Editors

The use of biomass as a renewable feedstock, in the place of fossil resources, is significantly increasing for the production of chemicals, material, and bioenergy. However, biorefinery strategies have to fulfil specific innovative requirements which allow them to be sustainable. In this contest, (bio)catalysis could play a significant role for biomass conversion, since it promotes the development of eco-friendly and competitive production. The possibility to develop innovative/sustainable (bio)catalytic systems is also highly desired in order to easily shift systems on the industrial scale. This Special Issue aims to collect the most recent and innovative contributions for the development of effective (bio)catalysts and their integration with other systems (e.g., membranes, nanotube, sensors).

### Guest Editors

Dr. Rosalinda Mazzei

Institute on Membrane Technology, CNR-ITM, 87036 Rende, Italy

Dr. Teresa Poerio

Institute on Membrane Technology (CNR-ITM), University of Calabria, Arcavacata di Rende, 87036 Cosenza, Italy

### Deadline for manuscript submissions

closed (15 October 2023)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn  
Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
