

## Special Issue

# Frontiers in Catalytic Emission Control

### Message from the Guest Editors

*Catalysts* is releasing a Special Issue on the “Frontiers in Catalytic Emission Control”. The emission of gaseous pollutants such as SO<sub>2</sub>/NO<sub>x</sub>/CO/HCs/VOCs/CO<sub>2</sub>/Hg emitted from power stations, factories, and automobiles is believed to be one of the most serious environmental challenges of the 21st century. To meet the ever-increasing demand for the control of the ecological environment, this Special Issue collects the developments made regarding flue gas. We are interested in, but not limited to, the study of low-temperature denitration catalysts, VOCs catalytic oxidation technology, and technology for the coordinated control of multiple pollutants. Particular focus is on the discovery of novel environmental catalytic materials, in situ reaction mechanisms, DFT calculations for catalytic processes or mechanisms, and catalytic models for applications.

### Guest Editors

Dr. Zhanggen Huang

Dr. Chen Wang

Dr. Yaqin Hou

### Deadline for manuscript submissions

closed (30 November 2022)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn  
Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
