Enzyme-Mediated Stereoselective Synthesis II

Message from the Guest Editor

Nowadays, chemists have become accustomed to the idea that the use of enzymes is essential in a modern synthetic laboratory. It does not matter if a given transformation is performed using whole cell microorganisms or using an isolated enzyme. In both cases, the specific activity and selectivity of one or more enzymes is exploited. In fact, biocatalysts allow for performing a number of chemical reactions with high regio- and stereoselectivity. This second Special Issue on Enzyme-Mediated Stereoselective Synthesis has been planned in order to collect original research papers, reviews, and commentaries focused on the exploitation of enzyme stereoselectivity in organic synthesis. Contributions dealing with enzyme-mediated stereoselective synthesis of relevant chemicals, such as innovative materials; active pharmaceutical ingredients; natural products, flavors, and fragrances; and any other kind of bioactive compounds, are welcome.

Guest Editor

Prof. Dr. Stefano Serra

Consiglio Nazionale delle Ricerche (C.N.R.), Istituto di Scienze e Tecnologie Chimiche (SCITEC), Milano, Italy

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
