

Special Issue

Recent Advances in Organometallic Chemistry and Catalysis

Message from the Guest Editor

Organometallic compounds have had a tremendous impact on modern organic synthesis and are nowadays commonly employed as catalysts for the production of fine chemicals, pharmaceuticals and materials, such as polymers. In addition, organometallic catalysis gives the opportunity to assemble organic molecules in a highly efficient and selective manner that cannot be envisioned otherwise, and can be applied in the development of improved sustainable chemical transformations. This special issue of *Catalysts* intends to cover recent developments in the application of organometallic compounds in catalytic organic synthesis, including mechanistic studies. Submissions are very welcome in the form of original research papers or short reviews that reflect the state of research in the field.

Guest Editor

Prof. Dr. Victorio Cadierno

Department of Organic and Inorganic Chemistry, University of Oviedo,
Julián Clavería 8, 33006 Oviedo, Spain

Deadline for manuscript submissions

closed (31 December 2020)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
