Photo(electro)catalysts Green Chemistry, Environmental Pollution, and Energy Applications

Message from the Guest Editors

This Special Issue, entitled “Photo(electro)catalysts: Challenges and Applications”, aiming to cover the latest research progress in the field of photocatalysis and electrocatalysis, including the design of new photo/electrocatalysts for green chemical reaction, and development of in situ/operando characterization techniques for revealing the reaction mechanisms, as well as the integrated design and performance optimization of advanced photo/electrocatalytic devices. All studies (experimental and theoretical) within the scope of this Special Issue, including original research work and review articles, short communications, and perspectives, are welcome.
