

Special Issue

Catalytic Conversion and Utilization of Biomass

Message from the Guest Editors

The chemicals, energies and materials associated with biomass are renewable and sustainable, and have the potential to replace fossil feedstocks. The scope of this Special Issue includes, but is not limited to, the following areas:

- Chemocatalytic depolymerization of biomass;
- Upgrading of biomass and lignin to fuels and chemicals;
- Novel and high-efficiency biomass fractionation methods for improving lignin quality and promoting the enzyme hydrolysis of cellulose;
- Structural elucidation of native and fractionated biomass, such as cellulose, hemicelluloses and lignin;
- Lignocellulose-based materials;
- Process simulation of integrated biorefinery and techno-economic analysis;
- Bioenergy and biomass biorefinery results from pilot, demonstration and industrial plants.

We look forward to receiving your contributions.

Guest Editors

Dr. Xiaojun Shen

Beijing Key Laboratory of Lignocellulosic Chemistry, Beijing Forestry University, Beijing 100083, China

Dr. Chao Xie

National & Local Joint Engineering Research Center on Biomass Resource Utilization, College of Environmental Science and Engineering, Nankai University, Tianjin 300350, China

Deadline for manuscript submissions

15 August 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
