

Special Issue

Advanced Functional Two-Dimensional, Layered and Hybrid Composite Materials for Catalytic Applications

Message from the Guest Editor

This Special Issue aims to highlight recent advances in the design, synthesis, characterization, and catalytic performance of 2D materials, layered structures, and their hybrid composites for various optoelectronic and photocatalytic applications. The research topics of interest include, but are not limited to, the following:

- Two-dimensional and layered materials;
- Materials synthesis and applications;
- Catalysis;
- Photocatalysis;
- Electrocatalysis;
- OER;
- HER;
- Energy storage;
- Hydrogen production;
- Fuel cells.

Original research articles and comprehensive review articles (both experimental and theoretical studies) in the field of catalysis, photocatalysis, and electrocatalysis are welcomed.

Guest Editor

Dr. Khursheed Ahmad

School of Chemical Engineering, Yeungnam University, Gyeongsan, Republic of Korea

Deadline for manuscript submissions

30 November 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
