

## Special Issue

# Ionic Liquids and Eutectic Mixtures for Green Catalytic Processes

### Message from the Guest Editors

Ionic liquids and eutectic mixtures are distinct classes of solvents, but they share many characteristics, and both of them promise to overcome the shortcomings of conventional solvents in the design of environmentally sustainable processes. Defined as green “designer” solvents, they offer extraordinary advantages and find applications in many fields, including catalysis. This Special Issue invites the submission of full research articles, comprehensive reviews, and communications representing both experimental and theoretical studies that explore the fundamental understanding of ionic liquids and/or eutectic mixtures, their new methods of preparation, and their role in the design of environmentally friendly procedures.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn  
Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
