

Special Issue

Recent Advances on Sustainable Oxidative Catalysis

Message from the Guest Editors

Oxidation catalysis is one of the major areas of interest for both academia and industrial chemistry. Besides playing a crucial role in the current chemical industry for the production of key intermediates such as alcohols, epoxides, aldehydes, ketones and organic acids, it will also certainly contribute to the establishment of novel green and sustainable chemical processes. Innovative systems for pollutant abatement and for the production of clean energy have been created based in advanced sustainable oxidative processes. This special issue intends to outline the most recent achievements, current challenges and future opportunities on sustainable oxidative catalytic processes. The contribution of original research manuscripts or relevant critical review articles in this scientific field is both welcome and important for the current issue.

Guest Editors

Dr. Salete Balula

Dr. Luís Cunha Silva

Dr. Carlos M. Granadeiro

Deadline for manuscript submissions

closed (31 December 2019)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
