

Special Issue

Catalysis for Functionalization Reaction of Hydrocarbon Compounds

Message from the Guest Editor

This Special Issue focuses on the crucial field of catalysis for the functionalization reaction of hydrocarbon compounds, aiming to explore the latest advancements and innovations in this area. The background lies in the increasing importance of efficient and selective catalytic processes for transforming hydrocarbon compounds into valuable products. The scope encompasses various aspects, including the development of novel catalysts, understanding the reaction mechanisms, optimizing reaction conditions and exploring the application of these reactions in different industrial sectors. This Special Issue provides a platform for authors and readers to share their research findings, exchange ideas and contribute to the advancement of this field, ultimately driving the development of more efficient and sustainable catalytic processes for the functionalization of hydrocarbon compounds.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
