

Special Issue

Biomimetic Catalysts

Message from the Guest Editor

Nature has always been a great inspiration for synthetic chemists in finding new ways of preparing their molecules and reactions. Catalysis is arguably one of the most efficient, economic and environmentally benign ways of assemble useful molecules and materials for the betterment of human health. In fact, it is the foundation for the perfectly evolved biochemical pathways of the cell and consequently life. Thus, lessons from how natural catalysts operate can therefore be very important for the design of the next generation of catalysts and chemical processes. In this special issue, some of the state of the art in the broad field of “biomimetic catalysis” is presented.

Guest Editor

Prof. Dr. Armando Córdova

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
