

Special Issue

Advances in Catalytic Materials and Mechanisms for Sustainable Ammonia Synthesis

Message from the Guest Editors

The activation of nitrogen and ammonia synthesis has been of constant importance in basic organometallic chemistry, chemical manufacturing, biochemistry, and has recently been used as an effective hydrogen carrier to support the transition into a carbon-free hydrogen economy. This Special Issue invites submissions concerning the latest research in various aspects of ammonia synthesis, including photocatalytic/electrocatalytic methods, chemical looping, mechanochemistry, computational studies, and Haber-Bosch catalysts. Keywords:

- NRR
- Haber-Bosch
- chemical looping
- N₂ activation
- ammonia synthesis

Guest Editors

Dr. Yoji Kobayashi

KAUST Catalysis Center, King Abdullah University of Science and Technology, Thuwal, Saudi Arabia

Dr. Hiang Kwee Lee

Chemistry and Biological Chemistry Division, Nanyang Technological University, Singapore, Singapore

Deadline for manuscript submissions

closed (30 April 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
