

Special Issue

Recent Advances in Catalytic Materials toward Renewable Energy and the Removal of Environmental Pollutants

Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of recent advances in materials toward renewable energy and the removal of environmental pollutants. It also offers fresh perspectives into the development of new materials, including the fundamental exploration of the synthesis, characterization, and application from the laboratory scale to the industrial scale. Additionally, this Special Issue also encompasses reaction mechanisms, catalysis, photocatalysis, adsorption, ion exchange, kinetic modeling, thermodynamics, process integration, and optimization. Therefore, it aims to be informative and beneficial for scientists, researchers, engineers, and students working in the field of energy and environment.

Guest Editors

Dr. Chao-Wei Huang

Prof. Dr. Jeffrey Chi-Sheng Wu

Dr. Van-Huy Nguyen

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
