

Special Issue

Catalysis in Syngas

Message from the Guest Editors

This Special Issue aims to cover recent progress and trends in designing, synthesizing, characterizing, and evaluating advanced catalysts. Kinetic investigations and modeling studies of catalytic processes and structured catalytic reactors are particularly welcome. Contributions on methods aiming at electrifying the syngas production process, based, for example, on plasma-enhanced catalysis, are further invited. In any case, any original research and review articles dealing with any topic related to catalysis in syngas are welcome. We look forward to receiving your contributions soon.

Guest Editors

Dr. Fernando Bimbela

Grupo de Reactores Químicos y Procesos para la Valorización de Recursos Renovables, Institute for Advanced Materials and Mathematics (INAMAT2), Universidad Pública de Navarra, Pamplona, Spain

Dr. Panagiotis Kechagiopoulos

Chemical and Materials Engineering Group, School of Engineering, University of Aberdeen, Aberdeen, UK

Deadline for manuscript submissions

closed (31 October 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
