## **Special Issue**

## Enzymatic Catalysis in Bio-Based Chemicals Production

### Message from the Guest Editors

It is universally recognized that enzyme-mediated catalysis has become increasingly popular since enzymes are highly specific and efficient. The enzymatic reaction system offers several advantages in terms of improved reaction selectivity, reduced energy costs, enhanced reliability, environmental friendliness, and sustainability. In this Special Issue, we welcome original research articles and reviews focused on all aspects of enzymatic reaction for bio-based chemicals production, including process optimization, enzyme production, bio-reactor, biomass utilization, enzymology, nanotechnology, life cycle analysis etc.

## **About the Journal**

### Message from the Editor-in-Chief

### **Editor-in-Chief**

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan, KS, USA

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
