

Special Issue

Catalytic Oxidation of Methane

Message from the Guest Editor

This special issue will focus on the science and engineering of development of low-temperature catalysts (below 350 °C) for catalytic combustion of methane to carbon dioxide and water. Contributions on research and development in the following areas are welcome: (a) Development of low-temperature catalysts and processes for methane combustion. (b) Kinetics and mechanism of catalytic combustion of methane at low temperatures. (c) Processes/methods to stop or minimize catalyst deactivation and sintering. (d) Identification of surface species before/during/after catalytic combustion by XPS and other surface techniques.

Guest Editor

Prof. Dr. Anil Banerjee

Department of Chemistry, Columbus State University, Columbus, GA 31909, USA

Deadline for manuscript submissions

closed (30 November 2018)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
