

Special Issue

Towards Catalysts Prepared by Cold Plasma

Message from the Guest Editors

The aim of this Special Issue is to cover recent developments and further prospects in the field of catalysts produced using cold plasma. Publications in the form of original research papers or short reviews regarding all aspects of plasma-modified catalysts; plasma-assisted synthesized catalysts; and, above all, plasma-deposited thin-film catalysts are welcome. Any manuscripts discussing plasma processes associated with the production of catalytic materials; the molecular and nano structures of these catalysts; as well as their catalytic, electrocatalytic, and photocatalytic activity, both at the level of basic and applied research, are expected.
