

Special Issue

New Trends in Catalytic Conversion of Carbon Dioxide

Message from the Guest Editors

The aim of this Special Issue is to focus on the state-of-the-art, perspectives and targets to be developed in the CO₂ conversion to chemical and energy value products. Articles, reviews or short-reviews regarding carbon dioxide conversion to syngas, methanol, formic acid, dimethyl ether, hydrocarbons by Fischer-Tropsch reaction and methane, or regarding production of short-chain olefins (ethylene, propylene) by CO₂ consumption, are of great interest to this Special Issue. Moreover, the relevance of H₂ production using renewable energies and its consumption in the CO₂ conversion reactions is also an important focus of the Special Issue. In this view, works that outline on the current status of Power-To-Gas technology as smart recycling of carbon dioxide are welcome for publication in this Special Issue. The submitted manuscripts can cover different aspects, including the state of the art and design of catalysts and related considerations about the reaction mechanisms: all critically evaluated to give the insight into each reaction.

Guest Editors

Prof. Dr. Anastasia Macario

Environmental Engineering Department, University of Calabria, 87036 Rende, CS, Italy

Dr. Sudip Chakraborty

Department of Computer Engineering, Modeling, Electronics and Systems (D.I.M.E.S.), University of Calabria, Rende, Italy

Deadline for manuscript submissions

closed (30 June 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
