

Special Issue

Catalysis for Electro-oxidation of Ethanol & Methanol

Message from the Guest Editors

The aim of this Special Issue is to cover recent research progress in the fields of electro-oxidation of alcohols including but not limited to methanol and ethanol, especially research effort in fundamental understanding the effects of the atomic structures of the catalysts on the reactivity, selectivity and durability of the electro-catalytic processes using advanced theoretical and experimental approaches. The research results on the electro-catalytic process for the production of both electricity and chemicals are also welcome for submission.

Guest Editors

Prof. Dr. Xiaowei Teng

Department of Chemical Engineering, University of New Hampshire,
W301 Kingsbury Hall, 33 Academic Way, Durham, NH 03824, USA

Prof. Dr. Hao Yu

School of Chemistry and Chemical Engineering, South China University
of Technology, Guangzhou, China

Deadline for manuscript submissions

closed (31 October 2018)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
