

## Special Issue

# Irradiation-Driven Process Intensification in Heterogeneous Catalysis

### Message from the Guest Editors

In particular, this Special Issue will cover a range of different aspects related to new trends devoted to irradiation-driven processes. These include materials synthesis and characterization, catalysts, and reactors design and modeling, heterogeneous photocatalysis, microwave- and plasma-assisted heterogeneous catalysis, as well as techno-economic studies that evaluate the intensification potentials of such technologies against traditional catalytic conversion methods. Submissions to this Special Issue are welcome in the form of original research papers or short reviews that reflect the state of the art in the above-mentioned applications.

### Guest Editors

Dr. Ignacio Julian

Instituto de Nanociencia y Materiales de Aragon (INMA), Consejo Superior de Investigaciones Científicas (CSIC-Universidad de Zaragoza), 50009 Zaragoza, Spain

Dr. Carlos J. Bueno-Alejo

Department of Chemistry and Molecular and Cell Biology, University of Leicester, Leicester LE1 7RH, UK

### Deadline for manuscript submissions

closed (31 July 2021)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
