

Special Issue

Isomerization Catalysts

Message from the Guest Editors

Isomerization reactions have practical applications in diverse industries, e.g., improving the octane number of fuels in the energy industry or manipulating sugar in the food industry. The development of technologies to increase the efficiency of these isomerization reactions is a key challenge in sustainable product development. Thus, new catalytic formulation and configuration as well as exploring catalysts from natural resources for improving isomerization efficiency have been of interest to many researchers in recent years. For this Special Issue, we cordially invite review, expository, and original research articles dealing with recent developments in isomerization catalysts utilized in the field of electronics and in the energy, chemical, and food industries.

Guest Editors

Dr. Masaki Honda

Faculty of Science and Technology, Meijo University, Nagoya, Japan

Prof. Dr. Motonobu Goto

Department of Materials Process Engineering, Nagoya University, Nagoya, Japan

Deadline for manuscript submissions

closed (30 June 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
