

## Special Issue

# Novel Non-precious Metal Electrocatalysts for Oxygen Electrode Reactions II—Dedicated to Prof. Nicolas Alonso-Vante

### Message from the Guest Editors

Increasing inevitable global demands for energy have stimulated considerable research on alternative energy harvesting technologies, high-efficiency conversion and storage systems, and cost-effective and environmentally friendly systems. To date, the state-of-the-art catalysts for the ORR consist of platinum-based materials (Pt), while ruthenium (Ru)- and iridium (Ir)-oxides are excellent OER catalyst materials. The scarcity of precious metals, their prohibitive cost, and declining activity greatly hamper their use in large-scale applications. It is of paramount practical importance and interest to develop efficient and stable materials for the oxygen electrode, based on Earth-abundant non-noble metals. This Special Issue aims to cover recent progress and advances in novel non-precious metal electrocatalysts tailored with high activity and stability for the catalytic conversion between water and oxygen. Electrocatalytic activity, selectivity, durability, and mechanism for single or bifunctional oxygen electrode reactions are essential subjects for this Special Issue.

### Guest Editors

Prof. Dr. Yongjun Feng

Dr. Laura Calvillo

Prof. Dr. Luis Alberto Estudillo-Wong

### Deadline for manuscript submissions

closed (31 August 2023)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
