

Special Issue

Organometallic Catalysis for Organic Synthesis

Message from the Guest Editor

Transition metal catalysts are already an essential tool in modern organic synthesis. With transition metal catalysts, numerous challenge transformations have been realized. Concerning the reaction pathway, organometallic complexes are crucial. In this Special Issue, we plan to collect interesting transformations of carbonylation, cascade reaction, C–H activation, and so on.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
