

Special Issue

New Trends in Phillips and Other Catalysts for Ethylene Polymerization

Message from the Guest Editors

The goal of this Special Issue is to put together different contributions on the Phillips catalyst and on the catalysis of ethylene polymerization in general, spacing from the development of the process to the characterization of the catalysts (where appropriate, investigations on homogeneous catalytic systems will also be included). We hope that the Special Issue will be the chance to outline new trends on this topic and to foster the network between different research groups. We cordially invite you to submit a manuscript for consideration and possible publication. We hope this topic is of interest and look forward to hearing from you.

Guest Editors

Dr. Alessandro Piovano

Dr. Giorgia Zanchin

Prof. Dr. Silvia Bordiga

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
