Recent Advances in Polymerization Catalysis

Message from the Guest Editors

This Special Issue titled “Recent Advances in Polymerization Catalysis” seeks to present the current state-of-the-art on the subject and to explore potential future developments as a result of recent progress and modern trends in the field of polymerization catalysis, including the development of new metallic, organometallic, and organic catalysts, new advancements in polymerization catalysis and in the synthesis of new polymeric materials, and new insights into the mechanism of catalytic polymerization. Novel catalyst systems for carbon–carbon bond formation via polyinsertions, metathesis, coupling reactions, and controlled radical polymerizations, for ring-opening polymerizations of lactones, lactams, lactides, carbonates, and epoxides, and for the fabrication of creative topologies are within the scope of this Special Issue. Both original articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
