

Special Issue

Asymmetric and Selective Biocatalysis

Message from the Guest Editors

The preparation of pure chiral building blocks with the desired configuration is extremely important in different areas, especially in the production of pharmaceuticals. In this way, biocatalysts (cells, enzymes, catalytic antibodies, or ribozymes) represent the best alternative to the chemical processes because of the high regio- and enantio-selectivity towards different substrates at very mild conditions. This Special Issue will be focused on innovative and novel research in “Asymmetric and Selective Biotransformations”.

Guest Editors

Prof. Dr. Jose M. Palomo

Group of Chemical Biology and Biocatalysis, Department of Biocatalysis, Instituto de Catalisis and Petroleoquímica (ICP-CSIC), Marie Curie 2, 28049 Madrid, Spain

Prof. Dr. Cesar Mateo

CSIC - Instituto de Catálisis y Petroleoquímica (ICP), Madrid, Spain

Deadline for manuscript submissions

closed (31 October 2016)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
