Special Issue

Catalysis in the Synthesis of Phospholipids for Industrial Applications

Message from the Guest Editor

Today, chemoenzymatic modifications of phospholipids are under extensive studies. Many strategies are used for production of new multifunctional derivatives/conjugates of phospholipids. This Special Issue on “Catalysis in the Synthesis of Phospholipids for Industrial Applications” is dedicated to recent developments in the field of phospholipids and biocatalytic processes in which they are involved or can be applied for production of new therapeutics, nutraceuticals, biosurfactants, food additives or agents active in the prevention of civilization diseases. Colleagues are invited to participate by proposing original research papers, reviews, and opinions focused on biocatalytic methodologies or biocatalysts useful in the design of structured phospholipids with industrial applications.

Guest Editor

Dr. Anna Gliszczyńska

Department of Chemistry, Wrocław University of Environmental and Life Sciences, Norwida 25, 50-375 Wrocław, Poland

Deadline for manuscript submissions

closed (10 November 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan, KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
