Effects of Microglia Changes on Neuroinflammation and Neurodegeneration

Guest Editors:

Dr. Chi-Su Yoon

College of Pharmacy, Wonkwang University, Iksan-si, Republic of Korea

Dr. Dong-Sung Lee

College of Pharmacy, Chosun University, Gwangju 61452, Republic of Korea

Deadline for manuscript submissions:

31 May 2024

Message from the Guest Editors

Human lifespans have significantly extended, leading to a continuous growth in the percentage of elderly individuals in the population. This has led to the prevalence of numerous neurodegenerative diseases such as dementia, Parkinson's, Alzheimer's, and Huntington's disease. Microglia are found in the Central Nervous System (CNS), and these cells play crucial roles in the regulation of neuroinflammation and neurodegeneration. Neuroinflammation and neurodegeneration are key factors in the genesis of several neurodegenerative diseases; therefore, the importance of microglia research has been recognized, and studies in the related areas have proliferated.

This Special Issue will include 1) mechanism studies of neuroinflammation in microglia; 2) mechanism studies of neurodegeneration in microglia; and 3) studies on therapeutical candidates for microglia during neuroinflammation and neurodegeneration.

Special Issue

cells

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities,
6-145 Jackson Hall, 321 Church St
SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
