Natural Products and Their Derivatives in Immunity

Guest Editor:

Dr. Mamunur Rashid

Department of Pharmacy Practice & Science, School of Pharmacy, University of Nebraska Medical Center, 42nd and Emile, Omaha, NE 68198, USA

Deadline for manuscript submissions:

25 November 2024

Message from the Guest Editor

Dear Colleagues,

The aim of this Special Issue is to present the promising avenue for enhancing immunity and preventing diseases using natural product, and the understanding of immunization through natural products and their derivatives. Therefore, we are pleased to invite you to submit an article or review focusing on the role of natural products in immunity. Potential topics can include, but are not limited to, the following:

- The exploration of natural products and their derivatives in the context of immunity to offer promising avenues for enhancing immune responses and preventing diseases;
- 2. The mechanism of immune protection of natural products for various diseases, such as cancer, COVID-19, etc.;
- 3. Cell-based experiments that can reveal the molecular mechanism of immunity;
- 4. The synergistic effect of various natural products on immunity.

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
