## Cell Biology for Boron Neutron Capture Therapy (BNCT)

Guest Editors:

**Prof. Dr. Wolfgang Sauerwein**

**Prof. Dr. Mitsuko Masutani**

**Prof. Dr. Lucie Sancey**

**Prof. Dr. John Hopewell**

Deadline for manuscript  
submissions:

**closed (31 December 2024)**

### Message from the Guest Editors

Dear colleagues,

The emergence of epithermal neutron sources in hospitals has made boron neutron capture therapy (BNCT) a focus of innovative developments in radiation oncology.

Given the rapid progress in clinical and preclinical research on BNCT, we invite contributions for this Special Issue of *Cells* in the form of original research articles and reviews on all cellular aspects related to BNCT.

Relevant topics include, but are not limited to, the following:

- Radiation biology for BNCT;
- Cell-based studies;
- Drug development for BNCT;
- Impact of BNCT on the proteomic profile and omics approaches;
- Boron imaging;
- Mechanisms of action of BNCT;
- Immunological aspects, including abscopal effect of BNCT;
- Biomarkers for therapeutic optimization.

### Keywords

boron neutron capture therapy (BNCT)  
radiation biology  
radiation oncology  
drug development  
imaging  
targeted therapies  
boron chemistry

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
